REMARKS/DESCRIPTIONS: Jicaros have burnt interiors. About 1/3 of Sicario Jar rims are worn on neck-body break. Magdalena are eroded, paint largely gone. Miravalles incision is just barely visible, and not as precise as that from other areas. Monte Grande very eroded, many attributions based on paste alone; pastes also on the crude side. Maroncho incision is really eroded and hard to see. It is not as precise as elsewhere. Paste junky, lots of large temper.
